Decriminalizing Domestic Violence asks the crucial, yet often overlooked, question of why and how the criminal legal system became the primary response to intimate partner violence in the United States. It introduces readers, both new and well versed in the subject, to the ways in which the criminal legal system harms rather than helps those who are subjected to abuse and violence in their homes and communities, and shares how it drives, rather than deters, intimate partner violence. The book examines how social, legal, and financial
resources are diverted into a criminal legal apparatus that is often unable to deliver justice or safety to victims or to prevent intimate partner violence in the first place. Envisioned for both courses and research topics in domestic violence, family violence, gender and law, and sociology of law, the book challenges readers to understand intimate partner violence not solely, or even primarily, as a criminal law concern but as an economic, public health, community, and human rights problem. It also argues that only by viewing intimate partner violence through these lenses can we develop a balanced policy agenda for addressing it. At a moment when we are examining our national addiction to punishment, Decriminalizing Domestic Violence offers a thoughtful, pragmatic roadmap to real reform.

Exploring the dynamics between victim and offender is paramount to answering important issues of character and vital for forensic research. This involves examining the role of the victim during and after victimization; this process is especially important for spousal violence because of the interactive process between the victim and the offender. Forensic Psychology of Spousal Violence covers the phenomenon of spousal violence and its different forms, discussing the consequences of abuse, providing research tips to be used in the field, including relevant case studies and much more. The innovative approach of this text fills a void in the current understanding of spousal violence. Uses international statistics to present data of women battered and/or deceased to educate, change mindsets and practices and ultimately reduce the number of battered women and spousal homicides in the future Includes current case studies Includes best practices for spousal abuse investigations Portable for use in fieldwork

"The text provides a great, general overview of different areas of criminal and civil forensic psychology."  
—Apryl Alexander, PsyD, Clinical Assistant Professor, University of Denver

Written by authors with extensive experience in the field and in the classroom, Introduction to Forensic Psychology: Research and Application, Fifth Edition demonstrates how to analyze psychological knowledge and research findings and then apply these findings to the civil and criminal justice systems. Focusing on research-based forensic practice and practical application, this text uses real-life examples and case law discussions to define and explore forensic psychology. This text introduces students to emerging specializations within forensic psychology, including investigative psychology, family forensic psychology, and police and public safety psychology. Students will develop a multicultural perspective with an ethnic and racial sensitivity, which is critical to the successful
practice of forensic psychology. New to the Fifth Edition: Updated statistics, research, and case law, such as recent Aid in Dying legislation, as well as analysis of recent events, help students see the real-world applications to current events. Updated Focus boxes empower students to dig deeper into current issues, such as mental health courts, community-oriented policing, child abduction, hate crimes, the death penalty, and more. All Focus boxes also contain discussion questions for students to debate in a classroom setting. All new From My Perspective boxes provide students with information about career choices as well as helpful advice about pursuing their goals. Increased attention to immigration-related issues offers students additional insights into immigration proceedings and ways to consult with the courts. Additional coverage of human trafficking and online sexual predators enables students to better understand the psychological effects on victims and the services available to help. Current research on violent video games, cyberbullying, and cyberstalking provides real examples of the effects of violent media. New research on juveniles allows students to see the important contributions of neuropsychologists, particularly in terms of brain development in adolescents and promising community-based treatment approaches for juveniles. SAGE edge offers a robust online environment featuring an impressive array of free tools and resources for review, study, and further exploration, keeping both instructors and students on the cutting edge of teaching and learning. Domestic violence does not discriminate and is prevalent throughout the world regardless of race, age or socio-economic status. Why, then, do reactions and response differ so widely throughout the world? While some countries work diligently to address the matter through prevention and training, others take a ‘hands-off’ approach in their response. This book is one of the first to investigate domestic violence on a global scale and provides best practices gleaned from various countries around the world to paint a detailed picture of how police response to domestic violence is currently being conducted and provide training bodies with up-to-date information to enhance current curricula. Domestic Violence in International Context brings together expert scholars native to twelve different countries to examine the history and scope of domestic violence and how it is being addressed, repressed or ignored in their thirteen respective countries. Their specialised knowledge and unique data come together to create a series of snapshots that will guide nations, societies and communities worldwide in formulating effective strategies to prevent, intervene and combat this epidemic, and examine partnerships and programmes already in place. This book is essential reading for practitioners, policy
makers, and human rights organisations, as well as students and scholars of criminology, social work, sociology and law.

Social safety in social environments entails the sense of feeling safe with other people. Thus, social safety and security are very important to our life. Although research in this area has made significant progress in the past few years, there are still many social problems that require attention and further development in order to secure peace of mind. There is a very clear and accurate understanding and judgment of the overall situation of social security in the current and future period. This Special Issue focuses on a number of contemporary issues in social safety and security. The objective of this book is to rapidly disseminate the latest research and knowledge in this important area.

In this exciting new book John Hamel, author of the ground-breaking Gender-Inclusive Treatment of Intimate Partner Abuse, and Tonia Nicholls go beyond the traditional intervention theories of domestic violence practiced today. Offering alternative, unbiased and sometimes controversial views, theories, and current research, they, along with renowned contributors in the field, provide new treatment options that encompass a wide range of gender dynamics. Here are just some of the key principles covered: Interventions Should Be Based on a Thorough Unbiased Assessment Victim/Perpetrator Distinctions are Overstated, and Much Partner Abuse is Mutual Regardless of Perpetrator Gender, Child Witnesses to Partner Abuse are Adversely Affected, and are at Risk for Perpetrating Partner Abuse as Adults This new gender-inclusive approach to assessment and intervention provides a significant departure from traditional paradigms of domestic violence, and offers a much-needed awareness to effectively prevent violence in our communities today and for future generations.

Domestic Violence Advocacy: Complex Lives/Difficult Choices, Second Edition is a comprehensive and highly practical resource for anyone working with domestic violence victims. The essential elements and values of the victim-defined approach provide the foundation for a completely revised exploration of all victims’ perspectives and advocates’ roles. Authors Jill Davies and Eleanor Lyon draw on the far-reaching progress and increased knowledge of the field and delve deeply into the experiences of victims, their perspectives and decision-making, culture, and risks. Attentive to the real-world context of limited time, resources, and options for victims and for advocates, this enlightening text focuses on what is feasible and offers ideas for working
within such constraints.

In this three-volume set, an international team of experts involved in the research, management, and mitigation of hate-motivated violence examines and explains hate crimes in the United States and around the globe, drawing comparisons between countries as well as between hate crimes overall and domestic terrorism. • Examines the motivation, actions, and thinking of individuals who commit hate crimes, the effects on victims and society as a whole, and the national and international debates on punishments • Offers guidelines to educate about hate crimes and to serve at-risk populations • Includes vignettes from both perpetrators and victims as well as psychological profiles of hate crime offenders that serve to bring the academic discussions to life • Represents an ideal resource for academic libraries that will be of interest to those studying subjects ranging from sociology to ethnic studies and from law to international studies

From a domestic violence victims first call to police or visit to a women's shelter, through the offenders bail, sentencing, parole, and treatment program, criminal justice officers and clinicians must make informed decisions about which cases need the most attention as well as ensure targeted provisions are in place to prevent recurrences of violence. Authors Hilton, Harris, and Rice make a powerful case for using actuarial risk assessments to predict recidivism in male domestic violence offenders. These assessments, the Ontario Domestic Assault Risk Assessment (ODARA) and the Domestic Violence Risk Appraisal Guide (DVRAG), are the first in the field. The ODARA/DVRAG system helps criminal justice officials and clinicians decide which offenders pose the greatest risk to therefore preclude the most dangerous cases from falling through the cracks. Notably, the authors assert that systematically implementing these tools into public policy will reduce the number of violent assaults on women by their partners. The book draws on the authors in-depth empirical studies of violent men and their extensive experience with recidivism risk assessment in policing, court cases, offender assessment, and victim services. It is also a users manual replete with all the scoring, reporting, and interpreting details needed to effectively use the ODARA/DVRAG system. The inclusion of case examples, FAQs, scoring tools and forms, and sample assessment reports makes this an excellent resource for any professional working directly with domestic violence offenders or training criminal justice officers to conduct these risk assessments.
The second edition of this authoritative text helps professionals charged with curbing domestic violence to assess and manage offenders and their risk of recidivism. With thoroughly updated guidelines and scoring manuals based on user experiences and international research, this book presents a comprehensive risk assessment system comprised of the Ontario Domestic Assault Risk Assessment (ODARA) and the Domestic Violence Risk Appraisal Guide (DVRAG). It demonstrates how to score, interpret, and communicate the results of these evaluations, and how to incorporate their results into broader discussions of public policy. The detailed guidelines in this manual are accessible to a wide interdisciplinary audience, including psychologists, victim service and child protection workers, lawyers, police, and threat analysts. Also new to this edition are coverage of female offenders, alongside male offenders, and further guidance for assisting victims of domestic violence, making this a crucial resource for ensuring victim safety, treating offenders, and informing criminal justice procedures through empirically informed research and practice.

Domestic violence is a serious, widespread public, social and health problem that affects the lives of many women, children and men. There is also evidence to suggest it has one of the highest rates of recidivism. This comprehensive book provides an overview of what the research tells us about the perpetrators of domestic violence and what works, and what doesn’t, in promoting positive change. Collecting together the most up-to-date evidence from the international literature and bringing psychological, sociological, gendered and socio-political theoretical perspectives to bear on the issue, the authors explore: - what domestic violence is, why it happens and how it can be measured - who the perpetrators of domestic violence are, including discussion of non-stereotypical patterns such as male victims, female perpetrators, couples where the abuse is mutual, and couples with abusive relationships who want the abuse to end but the relationship to be sustained - strategies for engaging perpetrators in interventions and for promoting behaviour change - evidence-informed interventions, programmes and policies for working with perpetrators - where robust evidence is lacking and more research needs to be undertaken. Domestic violence is a significant problem for those individuals and families whose life is affected by this issue, the social, health and criminal justice agencies that respond to it, and wider society which must bear the costs and its devastating effects. This volume is an important reference for all those researching and working with the victims, survivors and perpetrators of domestic violence, including academics and students from fields such as social work, sociology, criminology, psychology and social policy.
Practitioners in the social, behavioral, and health fields often work with perpetrators and survivors of interpersonal violence. Many are asked to make predictions about the likelihood of future violence. Assessing Dangerousness reviews the intricacies of predicting intimate partner violence and homicide as well as child abuse and homicide to better prepare readers to make such assessments. Extensively revised, this classic volume highlights the latest research in clear and accessible language. Each contributor, a noted expert in their field, has faced the difficult task of assessing the risk of intimate partner violence and child abuse in courtrooms, clinics, shelters, hospitals, schools, and more. Their experience in research and practice makes this the go-to resource for anyone required to make predictions about violent behavior in family settings.

Assessing Dangerousness, Third Edition: Presents clinical and court examples requiring the assessment of risk and danger that appeals to practitioners in social work, psychology, nursing, counseling, criminology, and public health. Introduces an evidence-based approach that practitioners can use to integrate risk assessment in a variety of settings. Covers the latest risk assessment instruments for use in the field including the Danger Assessment, the DVSI-R, and the ODARA. Highlights the newest and most promising applications of risk assessment such as the Maryland Network Against Domestic Violence Lethality Assessment Program. Synthesizes related legal and ethical issues to help practitioners implement risk assessment in a responsible way. Identifies prediction factors and risk markers for use in interventions. Exposes the overlap between child and intimate partner homicide, instrumental in identifying families with multiple risks. Presents the latest research on the risk of re-assault in intimate partner violence and risk over the life course. Reviews the latest version of Dr. Campbell’s Danger Assessment, the most widely used homicide risk assessment instrument for intimate partner violence survivors. Introduces two new authors in the chapters on child abuse lethality assessments and risk of IPV exposing readers to the rising stars in the field.

This book makes an important contribution to the international understanding of domestic violence and shares the latest knowledge of what causes and sustains domestic violence between intimate partners, as well as the effectiveness of responses in working with adult and child victims, and those who act abusively towards their partners. Drawing upon a wide range of contemporary research from across the globe, it recognises that domestic violence is both universal, but also shaped by local cultures and contexts. Divided into seven parts: • Introduction. • Theoretical perspectives on domestic violence and abuse. • Domestic violence and abuse across the life-course. • Manifestations of domestic violence and abuse. • Responding to domestic violence.
and abuse. • Researching domestic violence and abuse. • Concluding thoughts. It will be of interest to all academics and students working in social work, allied health, sociology, criminology and gender studies as well as policy professionals looking for new approaches to the subject.

Psychopaths constitute less than 1% of the general population but over 20% of prison populations. They commit a disproportionate amount of crime and violence in society. Given that the economic burden of crime in the United States is estimated to be over $2.3 trillion per year, psychopaths likely constitute one of the most expensive mental health conditions known today. This volume chronicles the latest science of psychopathy and the various ways the condition intersects with the criminal justice system. From the modern techniques to assess the symptoms, to its utility in predicting violent recidivism, to the latest neuroscience youth and adults, and the most promising avenues for treatment, this volume captures the modern science of the condition and discusses ethical and legal issues surrounding psychopaths.

"This introductory chapter sets forth three foundations for threat assessment and management: the first foundation is the defining of basic concepts, such as threat assessment and threat management; the second foundation outlines the similarities and differences between threat assessment and violence risk assessment; the third foundation is a detailed overview of the research findings, theoretical avenues, measurement instruments, and developments in practice over the past quarter century. The goal of our chapter is to introduce the professional reader to the young scientific field of threat assessment and management, and to clarify and guide the seasoned professional toward greater excellence in his or her work"--

Presenting a comprehensive framework for conducting a scientifically grounded violence risk assessment, this book is authoritative, current, and practical. The essentials of doing this type of evaluation are reviewed, and available risk appraisal instruments are described for general violence, sexual violence, and spousal violence. The authors provide expert advice on choosing suitable instruments and approaches for particular cases, interpreting the resulting data, and communicating with legal decision makers. A detailed outline shows how to organize assessment findings into an effective final report; a sample completed report is featured in the appendix.
This textbook equips social workers and human services practitioners with the knowledge and skills to work effectively with both the victims and perpetrators of domestic violence. Written to address the needs of the social work and human services student learner, the book covers a range of domestic violence issues that will prepare the student for practice. With an underlying structural feminist conceptual framework that works towards empowering service users whilst challenging the structures that perpetuate violence, Working with Domestic Violence includes: 18 chapters covering the broad spectrum of issues that arise from working with domestic violence A clear practice framework for applying theoretical knowledge when working with individuals and families in domestic violence contexts Practice tips, key facts, case examples, activities, and reflective questions designed to enhance the reader’s engagement with the ideas, debates, and practice challenges introduced in the text An extensive index and glossary to support student understanding of the material A user-friendly and engaging style that will find application as an entire course book as well as for students or lecturers interested in selecting individual chapters for certain modules Working with Domestic Violence is essential reading for students undertaking undergraduate and postgraduate coursework courses in social work and human services, and those completing a postgraduate counselling qualification. The book will also be a valuable resource for students of community work, youth work, education, nursing and other allied health courses, community services, disability, and welfare studies.

Dit boek geeft een gedetailleerd beeld over wat er mogelijk is op vlak van screening en risicotaxatie bij partnergeweld. Er wordt een antwoord geboden op heel wat vragen waarmee de praktijk en de wetenschap worden geconfronteerd: Welke instrumenten zijn er beschikbaar om partnergeweld op te sporen of om het risico op een herhaling of een escalatie accuraat in te schatten?; Welke instrumenten leveren betrouwbare en valide resultaten op?; Welke methode is gebruiksvriendelijk voor niet-klinische professionals?; Hoe kan er multidisciplinair op een eenduidige wijze worden gecommuniceerd over risico’s?; etc. Goede screening- en risicotaxatie-instrumenten dragen bij tot betere beslissingen en effectievere maatregelen, op voorwaarde dat de toepassing en interpretatie correct gebeuren. Op basis van een nauwkeurig overzicht van de psychometrische en praktische kwaliteiten van deze instrumenten kunnen professionals een verantwoorde keuze maken. Het boek bevat heel wat richtlijnen voor wie op een gestructureerde en evidence-based manier wil werken in dossiers van partnergeweld.
Mental health professionals, more than any other clinicians, encounter legal issues on a regular basis. This is a book for anyone in the field, at any stage in their training or practice, who has ever found themselves scratching their head in confusion or dreading that they will expose themselves to liability as they navigate the complexities at the interface of law and mental health. Written by established experts and the rising stars of the next generation, the 16 chapters in this book offer readers a basic understanding of legal principles encountered in clinical practice, as well as practical advice on how to manage situations at the interface of law and clinical practice. Using case examples and clear language, this book helps clinicians understand the underlying principles behind the legal requirements of clinical care. It aims to enhance the reader's knowledge of legal issues and ability to deliver good clinical care when those issues are encountered. This book is unique in that it is, first and foremost, for mental health clinicians in training and those already in practice. While it is not a textbook for lawyers or forensic clinicians, forensic specialists and other professionals who encounter mental health issues in their work, such as law enforcement professionals, will benefit from its practical and clear discussion of legal and mental health issues.

This book brings rhetorical, legal, and professional communication perspectives to the discourse surrounding policy-making efforts within the United States around two types of violent crimes against women: domestic violence and sexual assault. The authors propose that such analysis adds to our understanding of rhetorical concepts such as kairos, risk perception, moral panic, genre analysis, and identity theory. Overall, the goal is to demonstrate how rhetorical, legal, and professional communication perspectives work together to illuminate public discourse and conflict in such complicated and ongoing dilemmas as how to aid victims of domestic violence and sexual assault, and how to manage the offenders of such crimes—social and cultural problems that continue to perplex the legal system and the social environment.

This book addresses the issue of domestic violence against women, drawing on research findings, policy developments and current debates to contextualise its alarming prevalence and to propose informed ways of addressing, through training and practice, the needs of both victims and perpetrators in current social and related care provision.

As riveting and current as today's headlines, CRIMINAL JUSTICE IN ACTION, 10th Edition, is designed with
today's busy students and instructors in mind. Concepts come alive thanks to vivid straight-from-the-headlines vignettes at the beginning of every chapter and real-world examples throughout the book. Choosing what's important to remember is a snap with each chapter's numbered objectives, which are reinforced throughout the chapter and in the book's supplements. Thinking critically and writing become less intimidating with the guidance of practical writing activities. Reviewers praise the crisp, clear topic coverage as well as the magazine-style design and captivating writing. And with the insightful coverage of ethics, policy, and discretion, students gain a panoramic view of key criminal justice issues that goes beyond learning facts. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This comprehensive Handbook of original chapters serves as a resource for clinicians and researchers alike. Two introductory chapters cover general issues in violence risk assessment, while the remainder of the book offers a comprehensive discussion of specific risk assessment measures. Forensic psychology practitioners, mental health professionals who deal with the criminal justice system, and legal professionals working with violent offenders will find the Handbook of Violence Risk Assessment to be the primary reference for the field.

With the world's prison population continuing to grow and the number of secure inpatient beds in psychiatric hospitals on the rise, establishing valid and reliable methods of identifying individuals who will commit violent acts is an important global health and public safety issue. One approach to identifying future offenders is through the use of risk assessment--unstructured and structured methods of predicting the likelihood of antisocial behavior. Although much has been written on the performance of risk assessment in research settings, little is known about current standards of practice and relevant public policy across the globe. International Perspectives on Violence Risk Assessment includes chapters by leading risk assessment scholars in more than 15 countries and explores the topic from a truly international outlook. Using findings from the seminal International Risk Survey (IRiS), the largest qualitative study in the history of the field, current assessment, management, and monitoring practices on six continents are explored. Authors identify and describe the most commonly used risk assessment tools, examine risk communication preferences, and provide recommendations for mental health practitioners, criminal justice professionals, and legal professionals. Finally, authors review the seminal research studies, current practice guidelines, and relevant
legal statutes of their jurisdictions. This volume serves as an invaluable resource for researchers, practitioners, and policymakers interested in this rapidly evolving field.

The new edition of this vital resource provides extensive coverage of the current state of research, theory, prevention, and intervention regarding violence against women. Each of the 18 chapters belongs to one of three parts: theoretical and methodological issues in researching violence against women, types of violence against women, or prevention and direct intervention. The editors and contributing authors have crafted their work to encourage discussion and debate and also to address issues of diversity and cultural contexts, as well as to examine inequalities of race and ethnicity, social class, physical ability, sexual orientation, and geographic location. Key Updates to This Edition: - A new and autobiographical Reflections piece appears at the end of each chapter. - Six completely new chapters address new and emerging topics, including assessment (Chapter 3), sexual harassment (Chapter 4), the effects of pornography (Chapter 7), cross-cultural issues (Chapter 8), the role of the economy (Chapter 9), primary prevention (Chapter 11), and school-based programs and interventions. Another recent subject the authors include is the role of faith-based initiatives. - The book's foreword is jointly written by Senators Amy Klobuchar (D--MN) and Al Franken (D--MN), both Congressional advocates on behalf of victims of violence against women.

The Forensic Psychologist’s Reporting Writing Guide is the first book to provide both student trainees and practitioners with best practice guidance for one of the core skills of their role. Written and edited by an international range of experts from the UK, North America and Australasia, it provides clear advice on a range of assessments, from psychometric tests to personality functioning, and includes real-life examples to illustrate key points. Uniquely, the book also offers guidance on the range of different client groups that forensic psychologists work with across both civil and legal contexts, including juveniles, female clients, couples and those with cognitive impairments. From core principles to writing style to key issues, each chapter also includes a checklist of advice and further reading. Comprehensive and practical, The Forensic Psychologist’s Reporting Writing Guide is a user-friendly companion to this critical and often overlooked skill, and will be essential reading for both neophyte and experienced forensic psychologists alike.

Master the nurse’s role in health promotion for Canadian populations and communities! Stanhope and
Lancaster's Community Health Nursing in Canada, 4th Edition covers the concepts and skills you need to know for effective, evidence-informed practice. It addresses individual, family, and group health as well as the social and economic conditions that can affect the health of a community. Concise, easy-to-read chapters include coverage of the latest issues, approaches, and points of view. Written by Canadian educators Sandra A. MacDonald and Sonya L. Jakubec in collaboration with Indigenous scholar Dr. R. Lisa Bourque Bearskin, this edition makes it even easier to apply nursing principles and strategies to practice. UNIQUE! Evidence-Informed Practice boxes illustrate how to apply the latest research findings in community health nursing. UNIQUE! Indigenous Health: Working with First Nations Peoples, Inuit, and Métis chapter details community health nursing in Indigenous communities. UNIQUE! Determinants of Health boxes highlight the critical factors contributing to individual or group health. Levels of Prevention boxes give examples of primary, secondary, and tertiary prevention related to community health nursing practice. CHN in Practice boxes in each chapter provide unique case studies to help you develop your assessment and critical thinking skills. How To boxes use real-life examples to provide specific, application-oriented information. Ethical Considerations boxes provide examples of ethical situations and relevant principles involved in making informed decisions in community health nursing practice. Cultural Considerations boxes present culturally diverse scenarios that offer questions for reflection and class discussion. Chapter Summary sections provide a helpful summary of the key points within each chapter. NEW! NGN-style case studies are provided on the Evolve companion website. NEW! Thoroughly updated references and sources present the latest research, statistics, and Canadian events and scenarios, including the latest Community Health Nurses of Canada (CHNC) Canadian Community Health Nursing Standards of Practice (2019 edition). NEW! Expanded coverage of global health, global issues, and the global environment is integrated throughout the book. NEW! Revised Working with People Who Experience Structural Vulnerabilities chapter views vulnerable populations through a social justice lens. NEW! Enhanced content provides greater application to practice. NEW! Further clarification of the differing roles of CHNs and PHNS is provided.

This expanded and updated new edition reflects the growing importance of the structured professional judgement approach to violence risk assessment and management. It offers comprehensive guidance on decision-making in cases where future violence is a potential issue. Includes discussion of interventions based on newly developed instruments Covers policy standards developed since the publication of the first edition.
Interdisciplinary perspective facilitates collaboration between professionals Includes contributions from P. Randolf Kropp, R. Karl Hanson, Mary-Lou Martin, Alec Buchanan and John Monahan

This book is the first to investigate the effects of participation in separation or divorce proceedings on femicide (murder of a female), femicide-suicide, homicide, and suicide. Because separation is one of the most significant predictors of domestic violence, this book is exclusively devoted to theorizing, researching, and preventing lethal domestic violence or other assaults triggered by marital separation. The authors provide evidence supporting the use of an estrangement-specific risk assessment and estrangement-focused public education to prevent murders and assaults. This information is needed not only by instructors in criminal justice and sociology programs, but by researchers theorizing about or investigating domestic violence. In the world of practitioners, family court judges, divorce mediators, family lawyers, prosecutors involved in bail hearings, shelter staff, and family counselors urgently need this resource. Ellis et al. include discussion questions and chapter objectives to support learners in the classroom or in community-based settings, and instructor support material includes PowerPoint lecture slides, additional teaching and research resources, and a test bank. This text advocates convincingly for prevention of domestic violence, and gives academics and practitioners the tools they need. This text advocates convincingly for prevention of domestic violence, and gives academics and practitioners the tools they need.

A comprehensive guide to the theory, research and practice of violence risk management The Wiley Handbook of What Works in Violence Risk Management: Theory, Research and Practice offers a comprehensive guide to the theory, research and practice of violence risk management. With contributions from a panel of noted international experts, the book explores the most recent advances to the theoretical understanding, assessment and management of violent behavior. Designed to be an accessible resource, the highly readable chapters address common issues associated with violent behavior such as alcohol misuse and the less common issues for example offenders with intellectual disabilities. Written for both those new to the field and professionals with years of experience, the book offers a wide-ranging review of who commit acts of violence, their prevalence in society and the most recent explanations for their behavior. The contributors explore various assessment approaches and highlight specialized risk assessment instruments. The Handbook provides the latest evidence on effective treatment and risk management and includes a number of well-established
and effective treatment interventions for violent offenders. This important book: Contains an authoritative and comprehensive guide to the topic Includes contributions from an international panel of experts Offers information on violence risk formulation Reveals the most recent techniques in violence risk assessment Explains what works in violence intervention Reviews specialty clinical assessments Written for clinicians and other professionals in the field of violence prevention and assessment, The Wiley Handbook of What Works in Violence Risk Management is unique in its approach because it offers a comprehensive review of the topic rather than like other books on the market that take a narrower view.

"From a domestic violence victim's first contact with authorities through the offender's bail, sentencing, parole, and treatment program, criminal justice officers and clinicians must make informed decisions about which cases need the most attention and must ensure targeted provisions are in place to prevent recurrences of violence. Hilton, Harris, and Rice make a powerful case for using actuarial risk assessments to predict recidivism in male domestic violence offenders. These assessments, the Ontario Domestic Assault Risk Assessment (ODARA) and the Domestic Violence Risk Appraisal Guide (DVRAG), are the first in the field. The authors assert that making it public policy to use these tools systematically will reduce the number of violent assaults on women by their partners. The book draws on the authors' in-depth empirical studies of violent men and their extensive experience with recidivism risk assessment in policing, court cases, offender assessment, and victim services. It also functions as a user's manual--replete with all the scoring, reporting, and interpreting details needed to effectively use the ODARA/DVRAG system. The inclusion of case examples, FAQs, scoring tools and forms, and sample assessment reports makes this an excellent resource for any professional working directly with domestic violence offenders or training criminal justice officers to conduct risk assessments"--Jacket. (PsycINFO Database Record (c) 2010 APA, all rights reserved).

Motivational Interviewing has becoming increasingly widespread among counselors and therapists, but no book to date has focused exclusively on applying Motivational Interviewing to domestic and partner violence. Written by established authorities in the field, the chapters in this volume represent important applications of motivational enhancement strategies to intimate partner violence with both victims and batterers. These studies include descriptive research on victims and perpetrators of abuse, measurement issues in assessing stages of change, and real-world applications of motivational interviewing. Murphy and Maiuro illustrate both
the benefits and challenges inherent in this growing area of research.

The Handbook of Violence Risk Assessment, Second Edition, builds on the first edition’s comprehensive discussion of violence risk assessment instruments with an update of research on established tools and the addition of new chapters devoted to recently developed risk assessment tools. Featuring chapters written by the instrument developers themselves, this handbook reviews the most frequently used violence risk assessment instruments—both actuarial and structured professional judgment—that professionals use to inform and structure their judgments about violence risk. Also included are broader chapters that address matters such as the consideration of psychopathy and how the law shapes violence risk assessment. Already the primary reference for practitioners, researchers, and legal professionals in this area, this second edition’s easy-to-access, comprehensive, and current information will make it an indispensable reference for those in the field.

The SAGE Handbook of Domestic Violence provides a rich overview of the most important theoretical and empirical work in the field, organized by relationship type. This Handbook is a unique and timely publication and a long awaited, valuable resource for the vast amount of Domestic Violence research centres and individual researchers across the globe.

"From assisted suicide and batter women to human trafficking and sex offenders, this guide provides an excellent overview of the state research on interpersonal violence. This set is highly recommended for academic libraries." —John R. M. Lawrence Interpersonal violence is behavior that intentionally threatens, attempts, or actually inflicts harm on another. This violence invades both the public and private spheres of our lives; many times in unexpected and frightening ways. Interpersonal violence is a problem that individuals could experience at any point during the life span—even before birth. Interpersonal violence is experienced not only throughout the life course but also as a global problem in the form of war, genocide, terrorism, and rape of women as a weapon of war. The Encyclopedia of Interpersonal Violence provides accurate, research-supported information to clarify critical issues and educate the public about different forms of interpersonal violence, their incidence and prevalence, theoretical explanations, public policy initiatives, and prevention and intervention strategies. These two volumes contain more than 500 accessible, jargon-free entries written by
This multidisciplinary volume assembles current findings on violent crime, behavioral, biological, and sociological perspectives on its causes, and effective methods of intervention and prevention. Noted experts across diverse fields apply a behavioral criminology lens to examine crimes committed by minors, extremely violent offenses, sexual offending, violence in families, violence in high-risk settings, and crimes of recent and emerging interest. The work of mental health practitioners and researchers is shown informing law enforcement response to crime in interrogation, investigative analysis, hostage negotiations, and other core strategies. In addition, chapters pay special attention to criminal activities that violate traditional geographic boundaries, from cyberstalking to sex trafficking to international terrorism. Among the topics in the Handbook:

- Dyadic conceptualization, measurement, and analysis of family violence.
- School bullying and cyberbullying: prevalence, characteristics, outcomes, and prevention.
- A cultural and psychological perspective on mass murder.
- Young people displaying problematic sexual behavior: the research and their words.
- Child physical abuse and neglect.
- Criminal interviewing and interrogation in serious crime investigations.
- Violence in correctional settings.
- Foundations of threat assessment and management.

The Encyclopedia of Interpersonal Violence is designed for members of the general public who are interested in learning more about various aspects of the problem of interpersonal violence, making it a must-have resource for academic and public libraries.
It also informs developers of crime prevention programs and practitioners assessing and intervening with criminal clients and in correctional facilities.

Victimology and crime prevention are growing, interrelated areas cutting across several disciplines. Victimology examines victims of all sorts of criminal activity, from domestic abuse, to street violence, to victims in the workplace who lose jobs and pensions due to malfeasance by corporate executives. Crime prevention is an important companion to victimology because it offers insight and techniques to prevent situations that lead to crime and attempts to offer ideas and means for mitigating or minimizing the potential for victimization. In many ways, the two fields have developed along parallel yet separate paths, and the literature on both has been scattered across disciplines as varied as sociology, law and criminology, public health and medicine, political science and public policy, economics, psychology and human services, and more. The Encyclopedia of Victimology and Crime Prevention provides a comprehensive reference work bringing together such dispersed knowledge as it outlines and discusses the status of victims within the criminal justice system and topics of deterring and preventing victimization in the first place and responding to victims' needs. Two volumes containing approximately 375 signed entries provide users with the most authoritative and comprehensive reference resource available on victimology and crime prevention, both in terms of breadth and depth of coverage. In addition to standard entries, leading scholars in the field have contributed Anchor Essays that, in broad strokes, provide starting points for investigating the more salient victimology and crime prevention topics. A representative sampling of general topic areas covered includes: interpersonal and domestic violence, child maltreatment, and elder abuse; street violence; hate crimes and terrorism; treatment of victims by the media, courts, police, and politicians; community response to crime victims; physical design for crime prevention; victims of nonviolent crimes; deterrence and prevention; helping and counseling crime victims; international and comparative perspectives, and more.
